Skills

Languages: Go, Python, Rust, Elixir, JavaScript/TypeScript, Java, SQL

DevOps/Infra: Linux, CLI, Ansible, Docker, AWS, Azure, Hetzner, GitHub Actions, Networking, Monitoring

Databases: PostgreSQL, Oracle, SQLite

Web: React, Vue, Phoenix, Spring Boot, REST API, HTML/CSS, Tailwind, Frontend testing

Soft skills: Self-motivation, Autonomy, Helping others, Curiosity, Fast-learner

Experience

Infrastructure/DevOps Engineer	myDiapason (FinTech SaaS, 20000+ users)	2023 - Present (Remote)
<ul style="list-style-type: none">Build Go, Python & Ansible tooling to automate infrastructure and operations for 50+ single-tenant SaaS deployments across 200+ Linux VMs in a high-security environment. Automated 20+ manual processes across provisioning, monitoring, migrations, audits, and more.Lead and execute migration of secrets management from KeePassXC to Infisical: plan access policies, codebase-wide refactoring (1000+ files), integration into developer environments.Work on self-service developer and operations internal platform, create workflows and maintain custom Java plugins.Participate in on-call rotation and improve monitoring and alerting to attain 99.9% SLA, debugging prod issues through SSH at all layers: DNS, iptables, systemd, routing, etc.Architect and develop automated VMWare Disaster Recovery Procedure of customer environment, reducing from manual multi-hour process to <1h fully automated.		
Junior Backend Engineer	myDiapason (FinTech SaaS, 20000+ users)	2022 - 2023 (Remote)
<ul style="list-style-type: none">Implement new features on Java 11 backend in collaboration with frontend team.Modernize 20+ years old codebase, remove deprecated usages, eliminate unnecessary dependencies.		
Fullstack Engineer Intern	WISEO (Software Consultancy)	2022 (Toulouse, France)
<ul style="list-style-type: none">Develop a web app for managing photos, using React/Typescript + Java/SpringBoot/Hibernate in a small agile team. Strong focus on testing.Set up a CI/CD pipeline with Jenkins + GitHub Actions and deploy project on AWS (Lambda + EC2 + S3 + RDS)		
Fullstack Engineer Intern	Groupe Flyover (Web & Mobile SaaS)	2021 (Remote)
<ul style="list-style-type: none">Rewrite mobile app from Ionic to FlutterImplement features for back-office with Vue.js/PHP Laravel		

Education

Master's Degree in Software Engineering, Computer Science & Applied Mathematics	2019 - 2022
ENSEEIH	Toulouse, France
Classes Préparatoires in Mathematics, Physics & Computer Science	2017 - 2019
Centre International de Valbonne	Sophia Antipolis, France

Projects

Remote Job Board (github.com/ddahon/workfromearth)

- Technologies:** Go, Alpine.js, Hetzner, GitHub Actions, SQLite, Python
- Job board for EU companies. Jobs are scraped directly from hand-curated list of companies' websites in Go. Server-side rendered using Go templ + Alpine.js for interactivity. Data processing/ML in Python.

Business Developer CRM (github.com/ddahon/mcrm)

- Technologies:** Elixir/Phoenix, Hetzner, PostgreSQL
- Custom CRM for business developers. Import/Export contacts from CSV, define tasks with reminders, generate emails from custom templates.

Keyboard-focused task management app (github.com/ddahon/kb-tasks)

- Technologies:** Rust, Tauri, Svelte, Typescript
- Desktop app focused on keyboard shortcuts workflow.

Self-hosting

- Technologies:** Docker, Linux, Hetzner
- Host personal apps on Hetzner VPS: media (Jellyfin), notes (Obsidian Sync), audiobooks/ebooks (Audiobookshelf), personal blog (Hugo).

Open-source

- Veloren:** 3D Voxel MMO in Rust (https://gitlab.com/veloren/veloren). Implemented close button for dialogue widgets.
